Project Description:

Willow Glen Apartments is a 74 unit apartment complex located on 4.09 acres in Central Point, Oregon. The project includes converting 18 of the 74 units into Project Based Section 8 Vouchers. Thirteen of the units will be two-bedrooms and five will be three bedrooms. The complex was built in 1995, funded in part by the Low Income Housing Tax Credit (LIHTC) program, a Trust Fund Grant from the State of Oregon as well as private-permanent financing. The project is beyond its 15-year LIHTC compliance period. In 2012 the Housing Authority of Jackson County (HAJC) formed a wholly-owned Oregon limited liability company to acquire the interest of the Limited Partner and the Special Limited Partner. Presently the HAJC is the general partner of the Partnership and its wholly-owned LLC is the only limited-partner of the partnership. When the project was built the owner committed to a 40-year affordability period. The project is to remain affordable to households at 60% area median income through January 1, 2033.

The subject project has been reviewed pursuant to HUD regulations 24 CFR Part 58, "Environmental Review Procedures for Entities Assuming HUD Environmental Responsibilities," and the following determination with respect to the project is made:

Additional source documentation for compliance Checklist placed below.

Airport Runway Clear Zones and Accident Potential Zones

The project is not going through construction or rehabilitation nor is the project area within 5,000 feet of a civilian airport, or 15,000 feet of a military airport. See map below.

Coast Barriers Resources

The project is not implementing construction or rehabilitation and is not located in a Coastal Zone as defined by the Oregon Coastal Management Program. The Project is also not located in a state identified as a Coastal Barrier Resources. See supporting evidence provided in the link below.

Flood Insurance

The project is not implementing construction or rehabilitation and is not located in Special Flood Hazard Area as defined by FEMA. The project area is located in Zone X, Areas Considered Outside of the 0.2% annual chance floodplain. Please also refer to the Environmental Justice source documentation below.

<https://msc.fema.gov/portal/search#searchresultsanchor>

Contamination and Toxic Substances

A one-mile radius evaluation was conducted to determine the presence of potential contaminants and/or toxic conditions. The "Radius" report pages 6 and 7 identifies any areas of concern based on reviewing the national and state data bases. The database search resulted in the following identified items:

1. Federal RCRA Generator- Gasoline service station with an air quality permit
2. CERCLIS: Two closed sites.
3. LUST: Seven closed sites
4. LUST: Two open sites (residential heating oil tanks), .24 miles and .49 miles away. They both are under remediation.
5. UST: Two active UST within 0.25 mi. They are both fueling stations with modern detection systems.

None of these items above present a threat to persons utilizing the PBVs at the Project.

Aerial photos were obtained dating from 2017 to 1954. The Project site prior to becoming the Willow Glen apartments was vacant land. In 1954 it appeared to be utilized as a hay field. The prior vacant land and low intensity agricultural use does not pose a threat to the persons utilizing the PBVs at the Project.

1-MILE RADIUS STREET MAP W/OCCURRENCES (MAP1)

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Occurrences are shown in three colors to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminants may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminant, amount released, and other variables, the distance from the source the contaminant may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes. This "MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP 5)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.
